

HYPER-V Backup

ALTARO

Does all the complex configuration connections and allows you to back up any Hyper-V VM in 5 clicks or less.

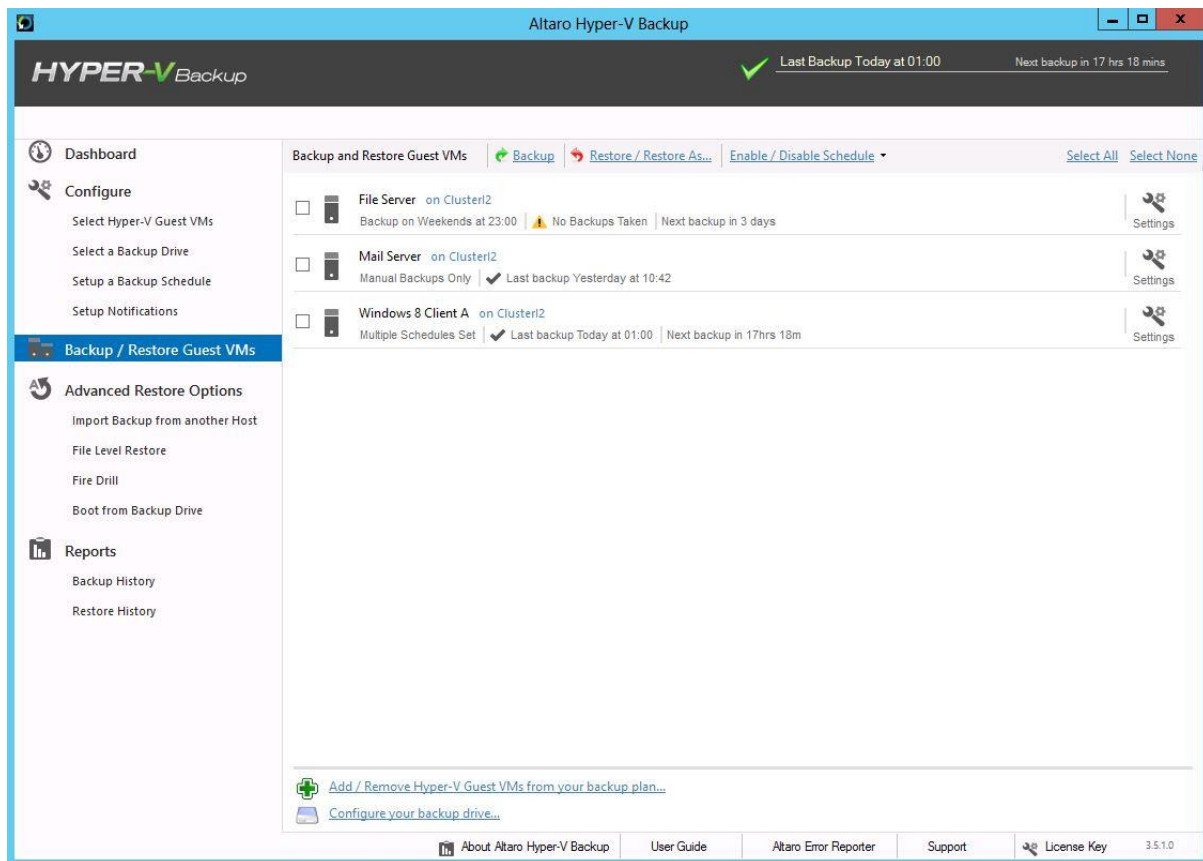

Fully Hyper-V Aware

Does all the complex configuration connections and allows you to back up any Hyper-V VM instance in 5 click or less.

Flexible & Full Featured

Only want to back up and restore one VM instead of the entire host? No problem, the power of choice is yours.

Supports Win 2012

Hyper-V backup solution that supports Microsoft Windows Server 2012 and Windows Server 2008 R2.

- **Hot Backups - MS VSS Integration**

Back up live VMs with zero downtime by leveraging Microsoft's VSS Hyper-V Writer.

- **InstantBoot - Boot VM from backup**

Boot a VM directly from backup and continue working within seconds.

- **ReverseDelta - 300% Faster Backups**

Only transfers changes at the block level, while performing on-the-fly deduplication.

- **File Level Restore**

Mount backed up VHDs and restore files without having to restore a whole Virtual Machine.

- **Supports Microsoft Hyper-V Server (Core)**

Supports Microsoft Windows 2008 [R2] & Windows Server 2012.

- **Exchange & MS SQL VM backups**

Commit databases in VMs that host Exchange, MS SQL or other applications compatible with the Hyper-V VSS Writer.

- **Backup Drive Swap Rotation**

Rotate backup drives on a daily basis through drive swap.

- **Live Backups of Linux VMs**

Back up crash consistent Linux VMs without shutting down the machine.

- **Restore to a different Hyper-V host**

Restore an individual or a group of VMs to a different Hyper-V Host.

- **Restore Clones**

Restore VMs to the same Hyper-V Host but with a different name.

- **Backs up Hyper-V Cluster Shared Volumes**

Cluster support for larger installations.

- **Central Management of CSV Clusters**

Configure, backup and manage all CSV cluster nodes from a single console.

- **CSV Aware Scheduling**

Group VMs on the same CSV together to decrease time in Redirected Mode through intelligent scheduling.

- **Flexible Backup schedules**

Group together and set different backup schedules for different VMs.

- **FireDrill Restore Tests**

Build and test a recovery plan to ensure you're covered in case of a disaster.

- **Restore different versions**

Restore from multiple points in time rather than just 'the most recent backup'.
