BackInTime Technology

Using the BackInTime browser it takes seconds to find and restore a file from any point in time.

- **Save Space - Only back up sections of files that changed using ReverseDelta™ Technology**

Using ReverseDelta™ incremental technology, Backup FS only backs up the actual changes you make to a file – without needing to back up the whole file again every time you make a change.

- **Continuous Data Protection (CDP) for Best Protection**

Highly tuned file-change-detection technology makes sure that you are protected at all time.

- **Double-Protection with Backup Drive Redundancy**

Automatically keep a double-backup to protect against theft, fire or loss of your backup drive.

- **Back up to NAS, Network Drive & USB**

Choose the locations where you want to back up to; offices can choose to backup to their server or NAS drive.

- **Automatic Backup on Connect with Plug & Protect™ - for Laptop Users**

Automatically initiates a backup once the backup drive is connected to the computer.

- **Restore different versions of your files with inbuilt BackInTime Technology**

Restore from multiple points in time rather than 'the most recent backup'

- **Email Notifications on Backup Success or Failure**

Receive email reports when a backup takes place. Providing peace of mind knowing that all your data is backed up.

- **Flexible Scheduling fits your needs**

With Backup Scheduling you can choose to backup multiple times a day or to back up automatically as soon as a file changes. You can also choose to back up multiple times a day at a pre-set time, say for example at lunch break and during the night.

- **Restore Files through Email**

With Altaro Backup FS you have the option to send a copy of the restored files to employees via email automatically - wherever they are in the world.

- **Unattended Backups**

Runs as a Windows service -ideal for unattended servers. Backs up even when users are not logged in.

- **Supports Windows 2012, 2008 (incl. R2), 2003 & Microsoft Small Business Server**

Fully supports Windows server operating systems including Microsoft SBS. Ideal for Small & Mid-Sized Businesses.
